## SUMMARY

Software Engineer with over 4.5+ years of expertise in building web applications and backend systems using Laravel, PHP, Golang, Vuejs. Skilled in crafting clear, maintainable code, scalable API development,

## PROFESSIONAL EXPERIENCE

### Software Engineer
01/2024 - Present

Shiprocket- eCommerce logistics and shipping software solution   Gurugram

- Managing the order creation flow at Shiprocket, integrating channels like Shopify, WooCommerce, Magento, Zoho, Wix, and Prestashop, while enabling custom order creation.
- Led key initiatives such as API migrations, courier rule enhancements, and scalability improvements, including transitioning WooCommerce and shopify from PHP to Go in Clean Architecture . Optimized API performance and system robustness to ensure seamless integrations and platform reliability

### Module Lead
01/2022 - 10/2023

Bluelupin Technologies Private limited   Noida

- Led the development of **Kidschaupal, a microservices**-based project facilitating live classes, events booking for students, leveraging Laravel and Vue.js technologies to ensure seamless functionality.
- Spearheaded the creation of a financial platform **app.niwish.com**, enabling the buying and selling of gold and silver using Nodejs, TypeScript. Designed the backend APIs, structured the database, and provided frontend support using React, contributing significantly to the project's success.
- Managed a team of 10 professionals, overseeing various projects and strategically planning their tasks to optimize productivity and ensure timely deliverables.

### Software Developer / Senior Software Developer
07/2020 - 01/2022

Bluelupin Technologies Private limited   Noida

- Significantly contributed to various prominent Laravel projects.
- **INDIAai (https://indiaai.gov.in)** : Led backend API development using Laravel and made significant enhancements to the Vuejs frontend for the National AI portal of INDIA. Played a key role in improving the platform for showcasing impactful AI content.
- **The Managr (https://themanagr.in)**: Collaborated on the NGO management platform used by Nasscom, utilizing Laravel and Vuejs for comprehensive development.
- **Doggiebazaar and Kidschaupal** (https://shop.kidschaupal.com): Developed complete backend infrastructure, including databases and APIs, for these eCommerce platforms, employing Laravel and Vuejs.
- **Mykartavya:** Contributed to the CMS and marketing website used by Nasscom, utilizing Laravel and Vuejs.
- **Digisakshar (https://digisakshar.in):** Played a pivotal role in the second phase of development, implementing multiple roles login and learning courses module, leveraging Laravel and Vuejs.
- **Sashakti:** Involved in the full lifecycle of this women's entrepreneurship platform, creating features like feeds, forums, and course modules using Laravel for backend APIs and CMS, while employing Vuejs for frontend development.

### Software Intern
01/2020 - 07/2020

Bluelupin Technologies Private limited   Noida

- Received training in Vue.js and Laravel, and contributed to developing 'Doggiebazaar,' an eCommerce platform, gaining hands-on experience and key insights into building eCommerce solutions with Laravel and Vue.js.
